

Freedom Series™ Thru Truss

The Bridge of Choice for Spans of up to 300 ft.

When you have to go the distance... and it has to be without piers... look to the Freedom Series Thru Truss to deliver clear spans of up to 300'. As the largest manufacturer in the U.S. of prefabricated steel truss bridges, you can rely on the structural integrity of our Freedom Series Bridge to meet your infrastructure needs. Our unique Double Bottom Chord tension member design eliminates the possibility for the collection of water and debris which will lead to the accelerated deterioration of the steel thereby reducing the useful life of the structure.

Add aesthetics to your bridge structure with the Freedom Series Thru Truss from U.S. Bridge - the Most Trusted Name in Bridges.™

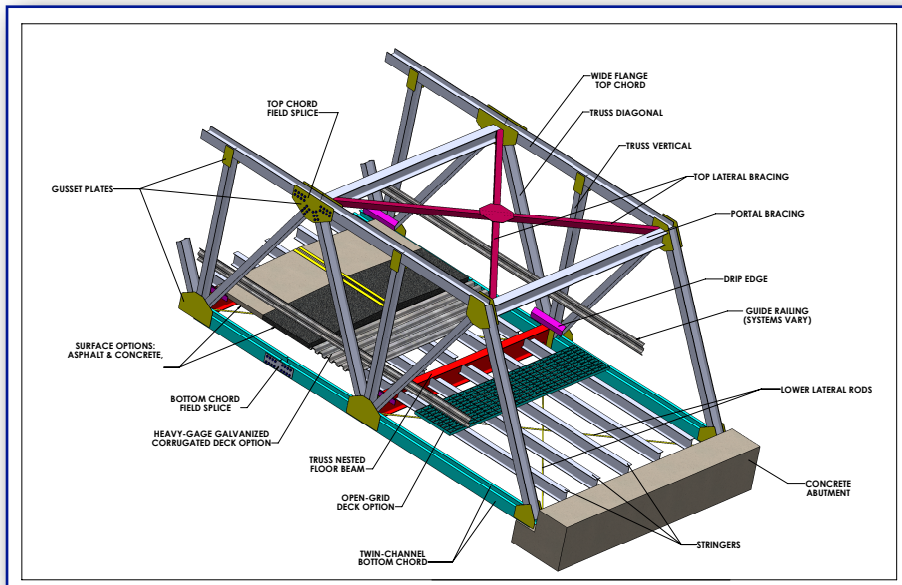

Freedom Series™ Thru Truss

Based on U.S. Bridge's proven Vehicular Truss bridge design, the Freedom Series Thru Truss incorporates upper lateral support bracing bars to accommodate bridge spans up to 300 ft.
